PRODUCT DATA SHEET

BFB PR 295 Polymerized Rosin (An alternative to Sylvaros PR 295)

BFB PR 295 is a low odor, non-crystallizing rosin. **This product is designed to replace Sylvaros PR-295.** It meets FDA requirements for 21 C.F.R. 175.105.

PRODUCT PROPERTIES

Specifications

Color, Gardner, 50% in toluene, max, 10
Softening Point, Ring & Ball, °C, 90 - 100
Acid Value, (mg KOH/g), min, 150

FEATURES

Higher softening point than unmodified rosin, higher heat resistant adhesives, faster setting adhesives, good adhesion at low temperatures, good specific adhesion to a wide range of substrates.

SUGGESTED APPLICATIONS

Hot melt adhesives for packaging adhesives, label adhesives, pick-up gums.

AVAILABLE FORMS/PACKAGING

Flaked, in multiwall bags, net 25 kgs.

STORAGE

Prolonged storage should be avoided due to the potential effect on performance.

SAFETY INFORMATION

Please refer to **Material Safety Data Sheet.** Non-hazardous.
