PRODUCT DATA SHEET

BFB PR 295A **(An alternative to Arizona's Sylvaros PR 295)**

BFB PR 295A is a polymerized rosin with properties that enable it to totally or partially replace modified rosins for improved properties. It has compatibility & solubility features that allow it to be used in a variety of adhesive, coating & compounding applications.

PRODUCT PROPERTIES

Specifications

Color, Gardner, Max, 8

Softening Point, Ring & Ball, °C, 92 - 100

Acid Value, (mg KOH/g), 145 - 170

FEATURES

Non-crystalline, good oxidative resistance, good adhesion to difficult to bond surfaces, higher viscosity in organic solvents, faster setting & higher heat-resistant adhesives, higher softening point.

SUGGESTED APPLICATIONS

Pressure sensitive adhesives, construction adhesives, pick up gums for labels, adhesion promoter for difficult to bond surfaces.

AVAILABLE FORMS/PACKAGING

Flaked, in multiwall bags, net 25kgs.

Solid form in galvanized steel rosin drums, 220 kgs. net.

STORAGE

Prolonged storage should be avoided due to the potential effect on performance.

SAFETY INFORMATION

Please refer to **Material Safety Data Sheet**. Non-hazardous.

METHODS OF ANALYSIS

Available on request.
